R647-4-110 - Reclamation Plan

- 110.1 Concurrent & post mining land use
Wildlife habitat needs to be included in both the premine and post mining land use.
(LK)
- 110.5 Revegetation planting program
The seed mix for revegetation submitted on November 28, 1997 differs significantly from the seed mix accepted in October of 1994. The November 28, 1997 mix contains only 2 grass species, 1 forb and 1 shrub. It is unlikely that the use of this mix will provide a permanent and diverse vegetation cover. Nor is it likely to meet postmining land use needs (wildlife habitat). Attached is the October 1994 seed list. Please commit to use this seed mix or provide documetation that demonstrates your new mix will establish a permanent and diverse vegetation cover and provide habitat for wildlife.
